

the WEATHER

in space

LILY - BLORGY - Hello folks here is today's weather forecast. Today on the sun it's going to be hot, hot, hot, so take your sun block!. It's going to be five thousand, five hundred and twenty seven°c.

TYPHAINE - OLIE - Wooooow they must be really hoooooot.

LILY - BLORGY - And that's not the hottest the sun can do. If you ever do decide to take the elevator down to the core, temperatures can soar up to fifteen million°c .

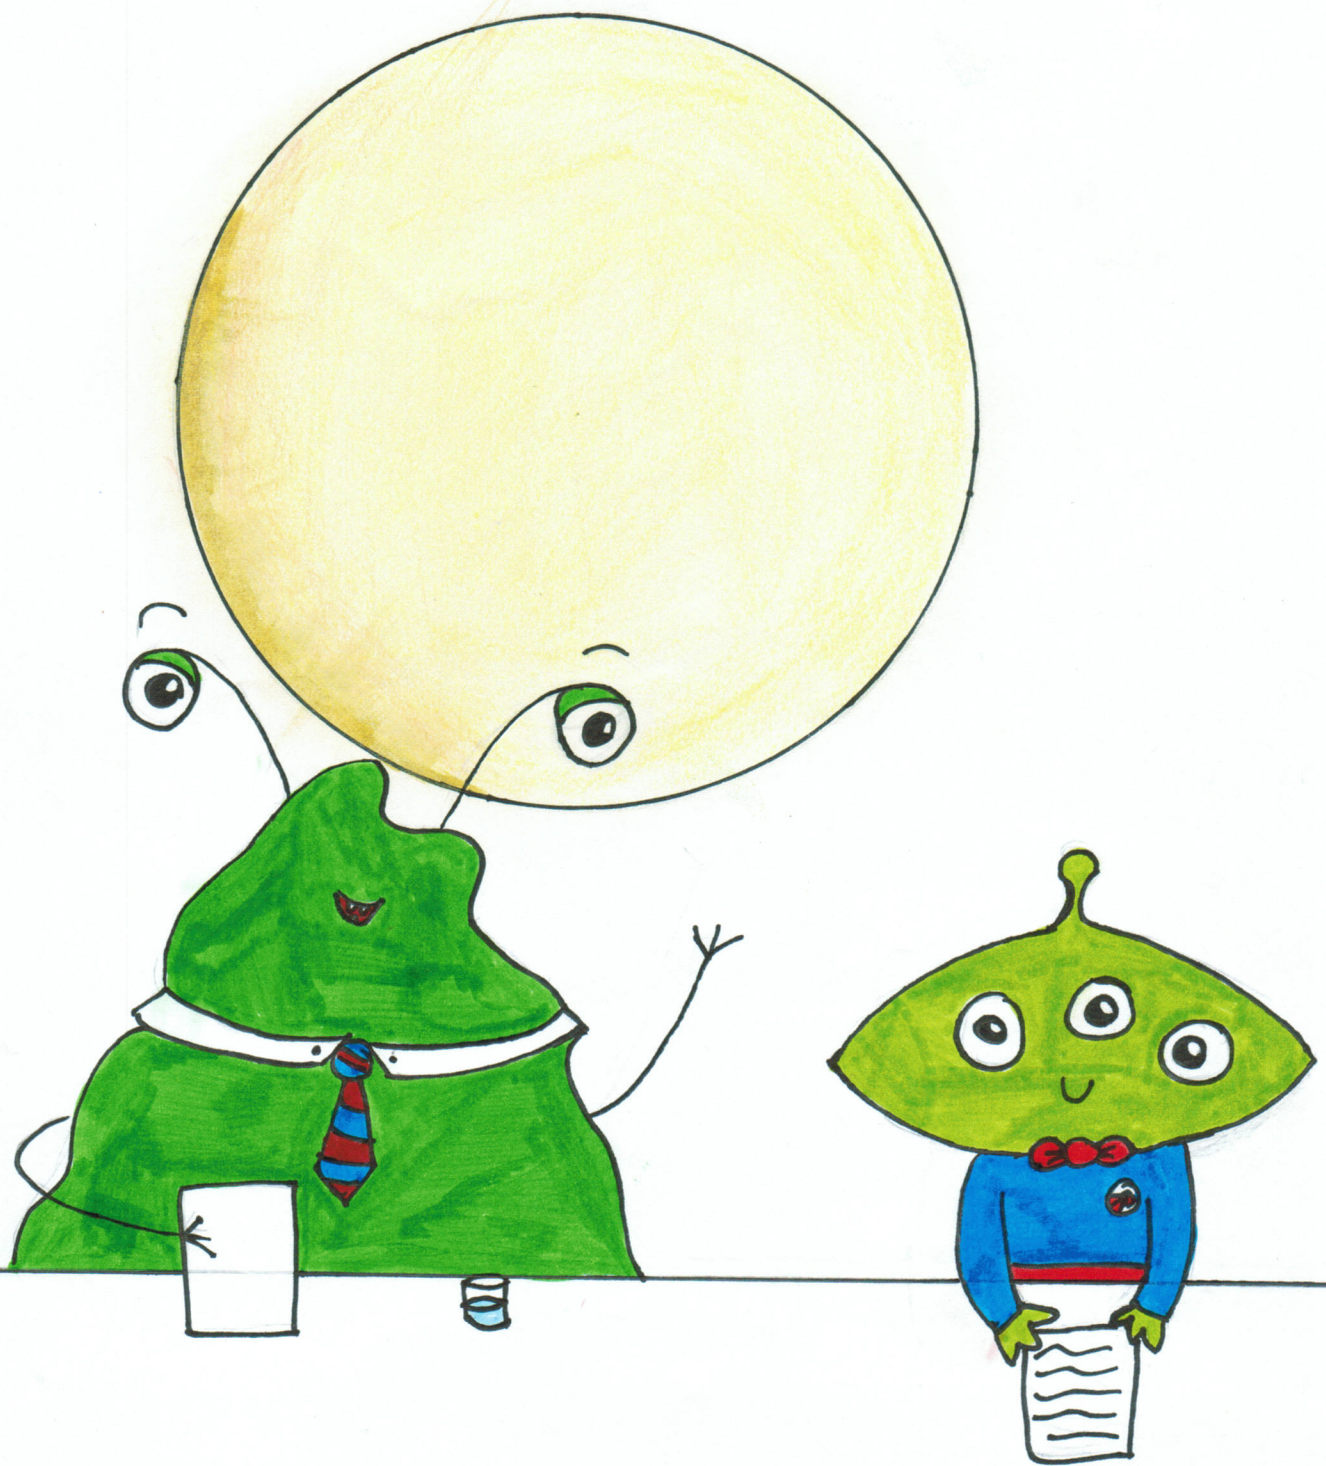

TYPHAINE - OLIE - Wooooow they must burn down there.

TYPHAINE - OLIE - Can I do Mercury?

LILY - BLORGY - Okay.

TYPHAINE - OLIE - So today it's going to be four hundred $^{\circ}$ c on Mercury and in the evening the temperatures could drop to minus one hundred $^{\circ}$ c.

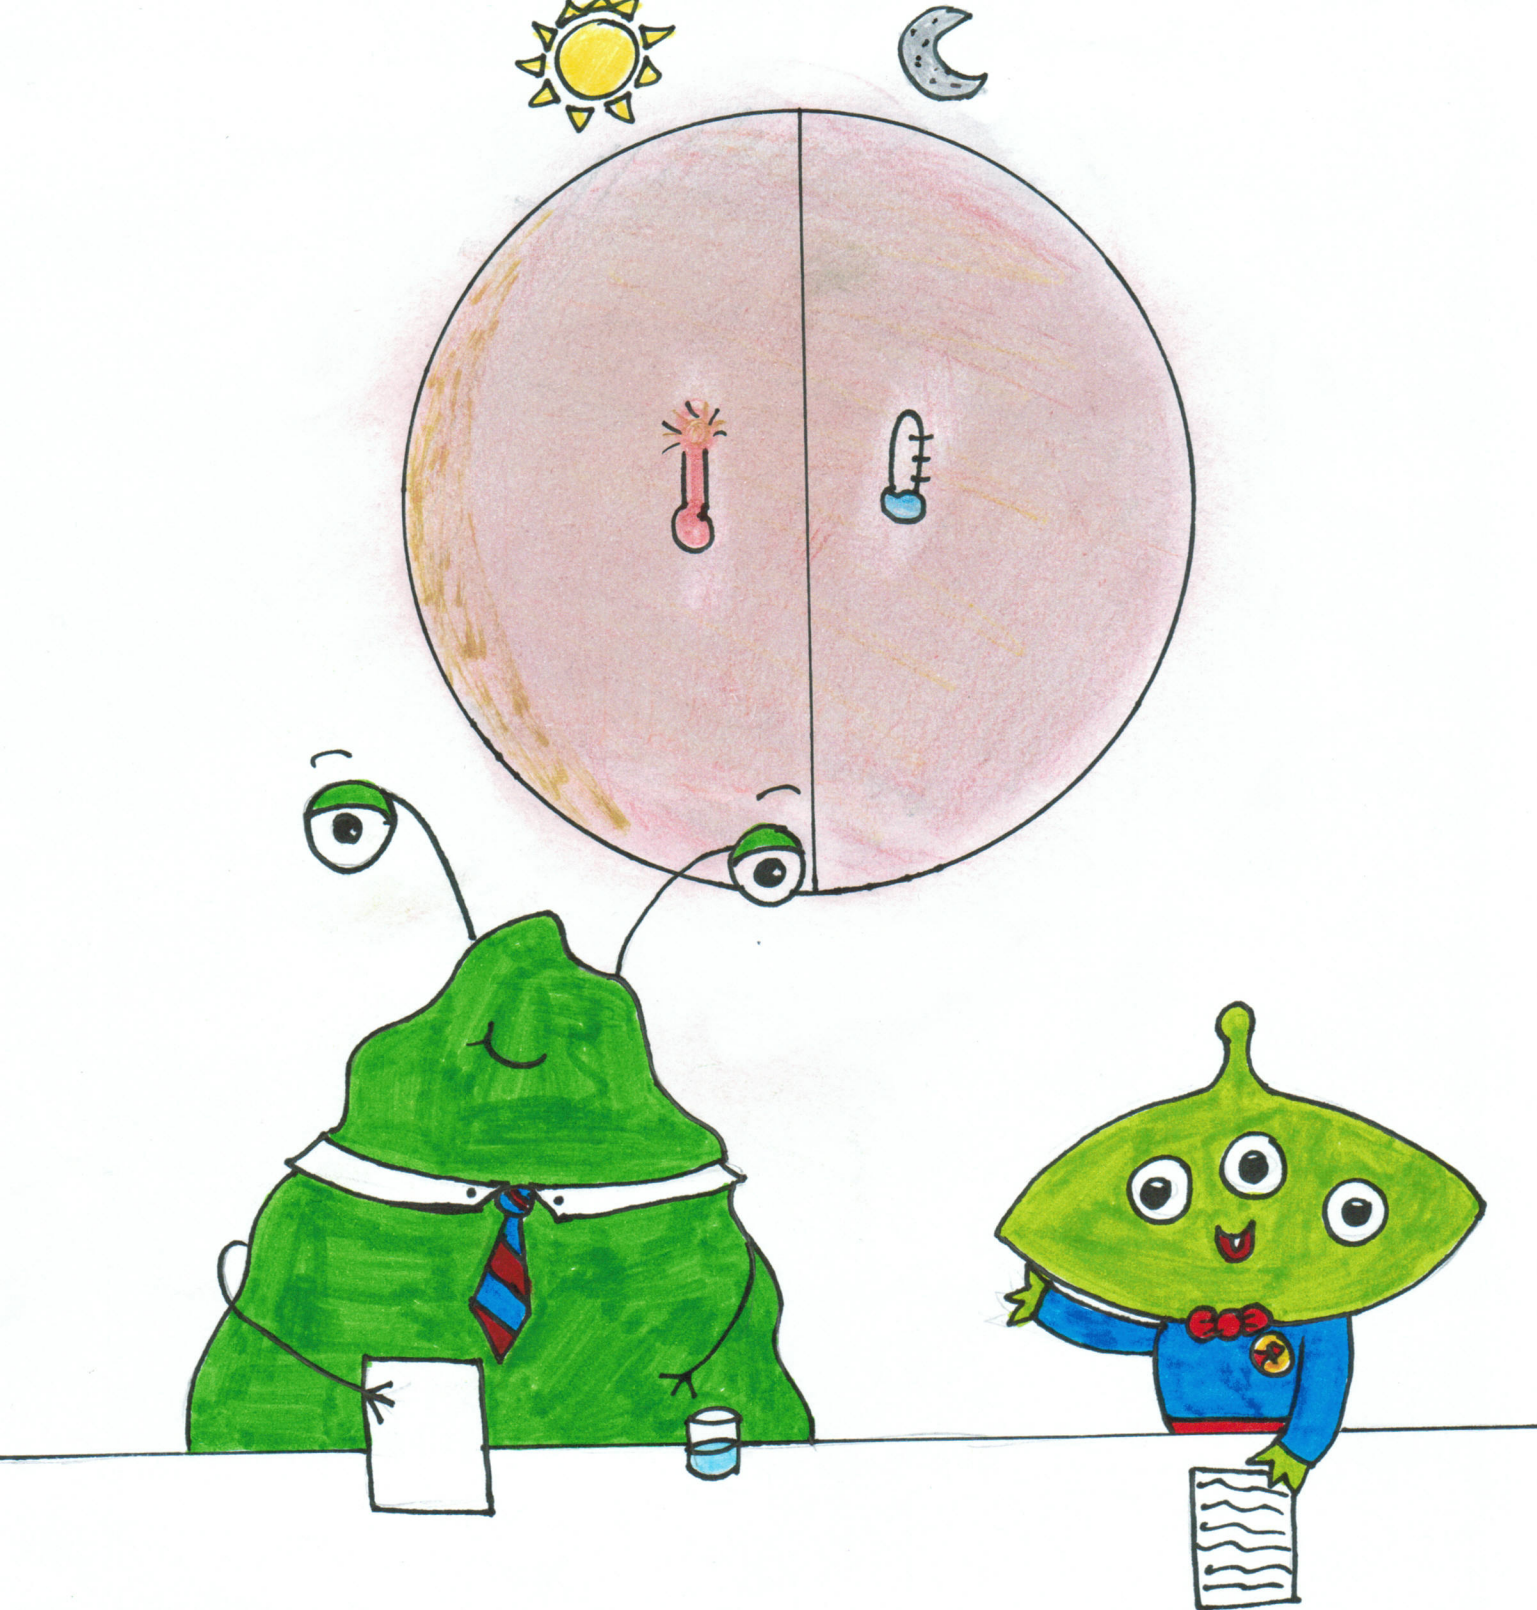

LILY - BLORGY - Perfect. Now, on Venus it's going to be really hot, it's going to be four hundred and seventy five°C.

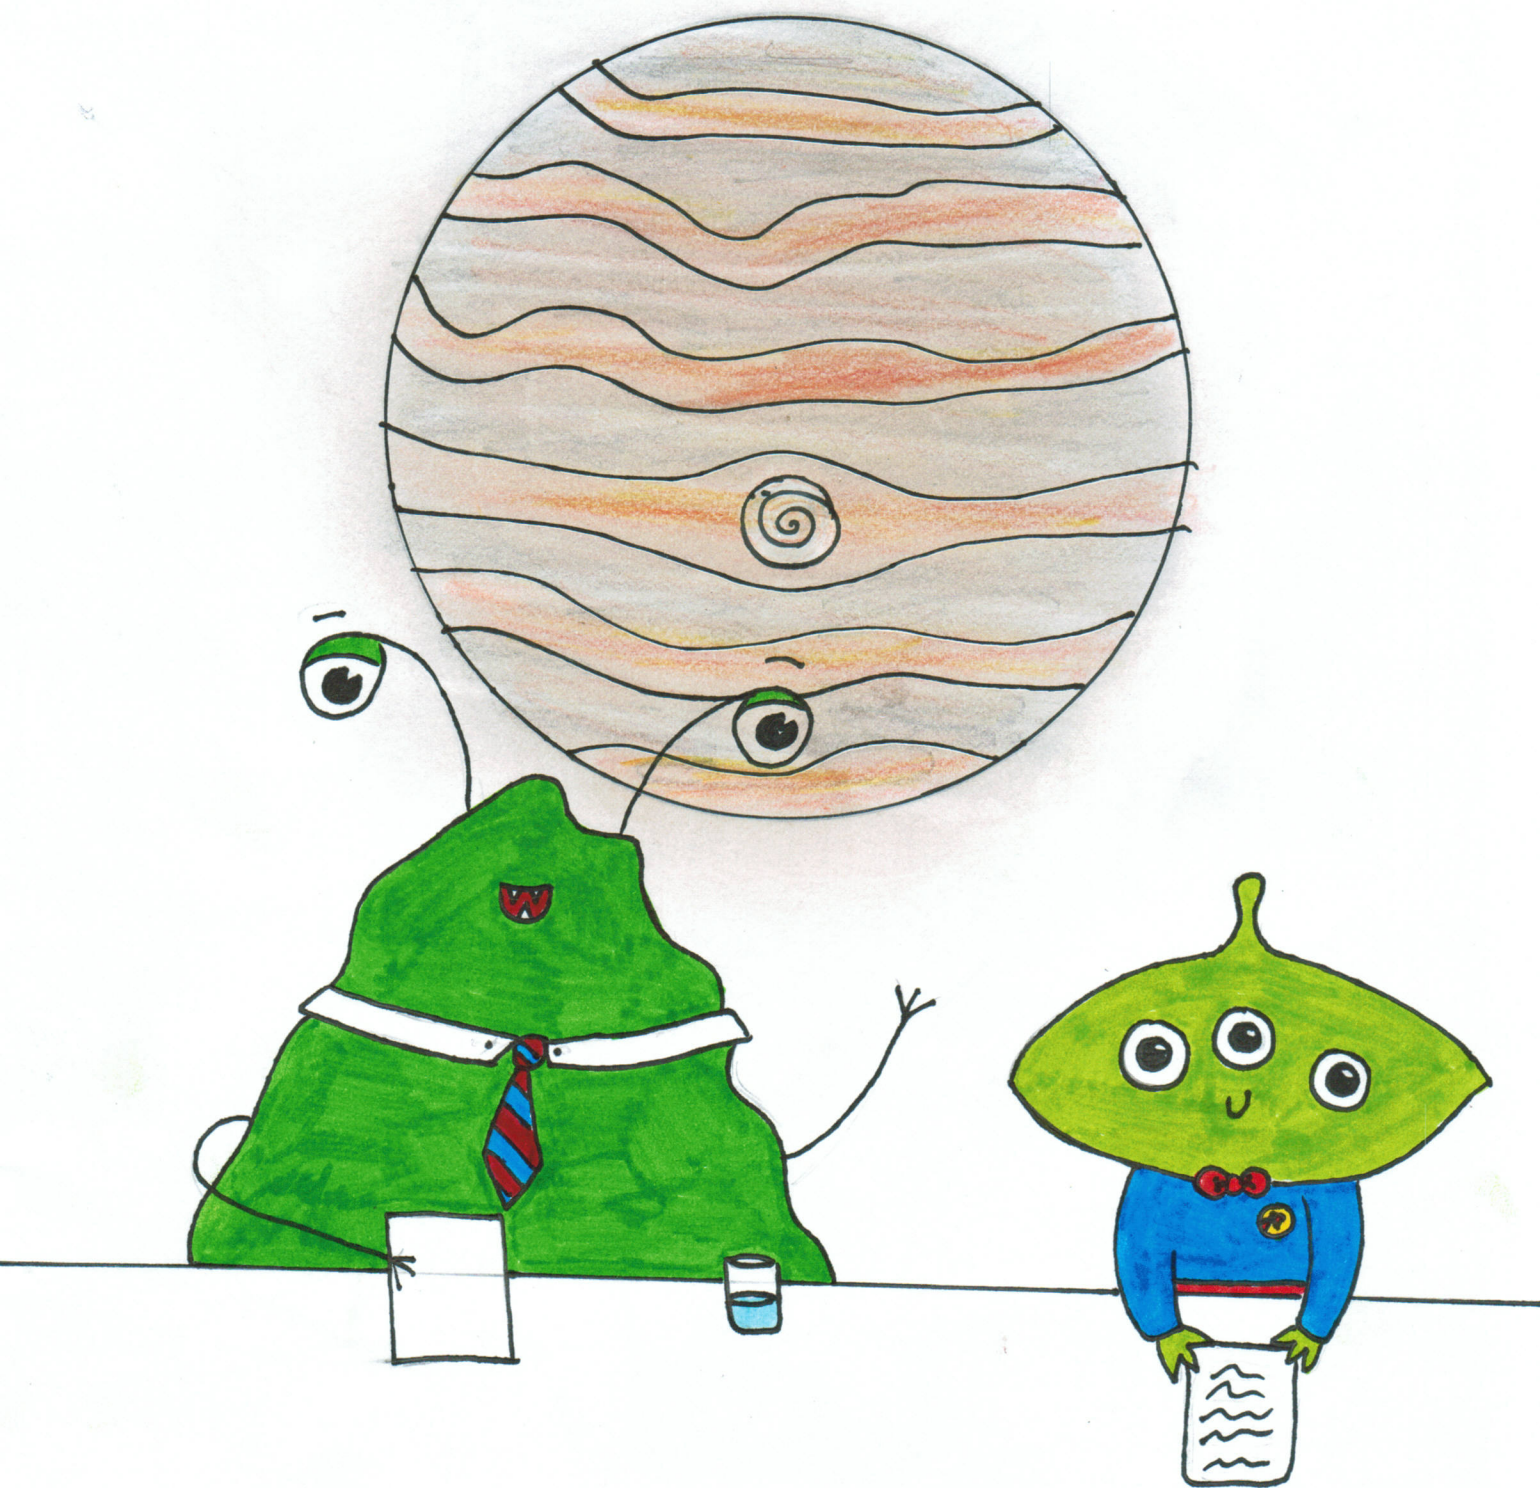

TYPHAINE - OLIE - On Earth, in Europe it's going to be eighteen[°]c and there is a chance of rain. In Africa it's going to be twenty eight[°]c, it's also going to be very dry. In Australia it's going to be twenty five[°]c and dry. In America it's going to be eighteen[°]c and there is a chance of twisters!! In Asia it's going to be a scorcher with temperatures reaching thirty four [°]c. In the North Pole it's minus fifteen [°]c and in Antarctica it's going to be minus twelve [°]c.

LILY - BLORGY - Great! Now, on the Moon it's going to be one hundred and seven °c but tonight it's going to be minus one hundred and thirty five °c. So hot water bottles at the ready everyone!!.

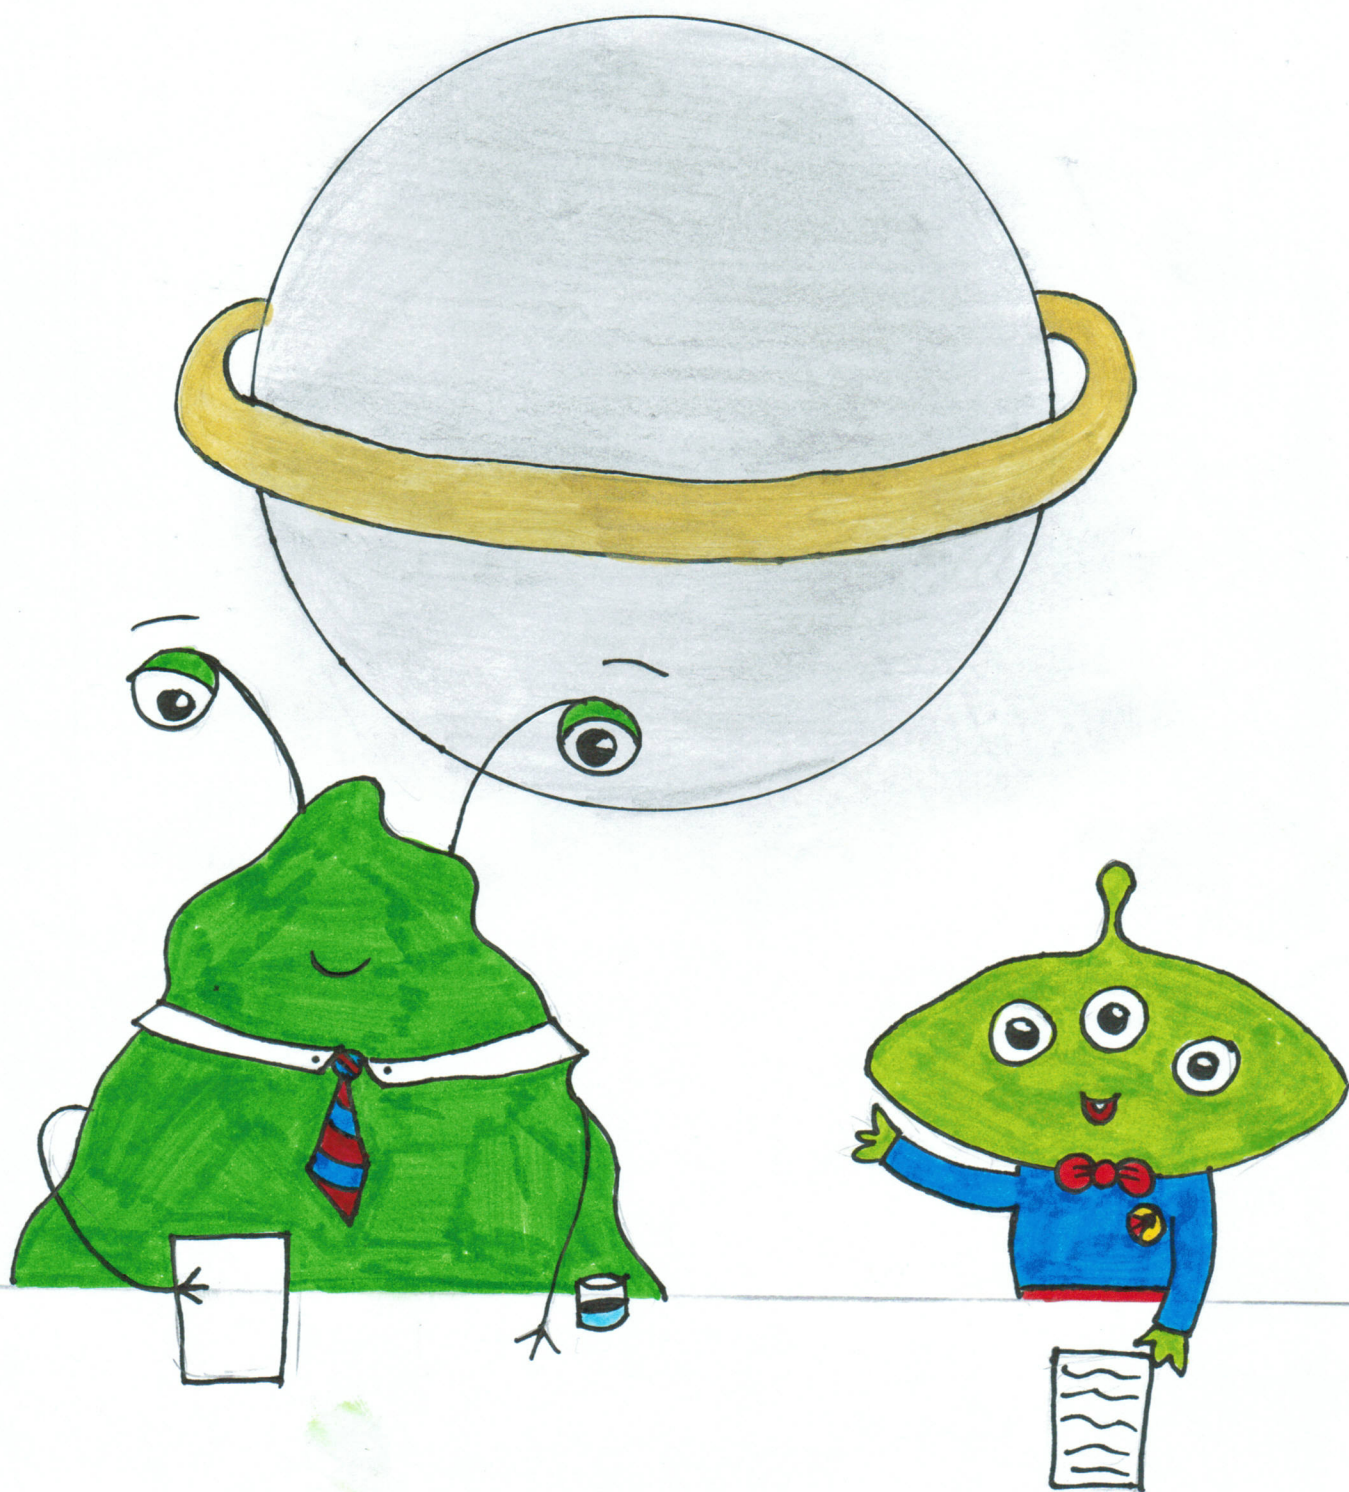

TYPHAINE - OLIE - Ok. On Mars today it's twenty°C but, tonight it will be minus seventy three °C . Brrrrr . Cold !

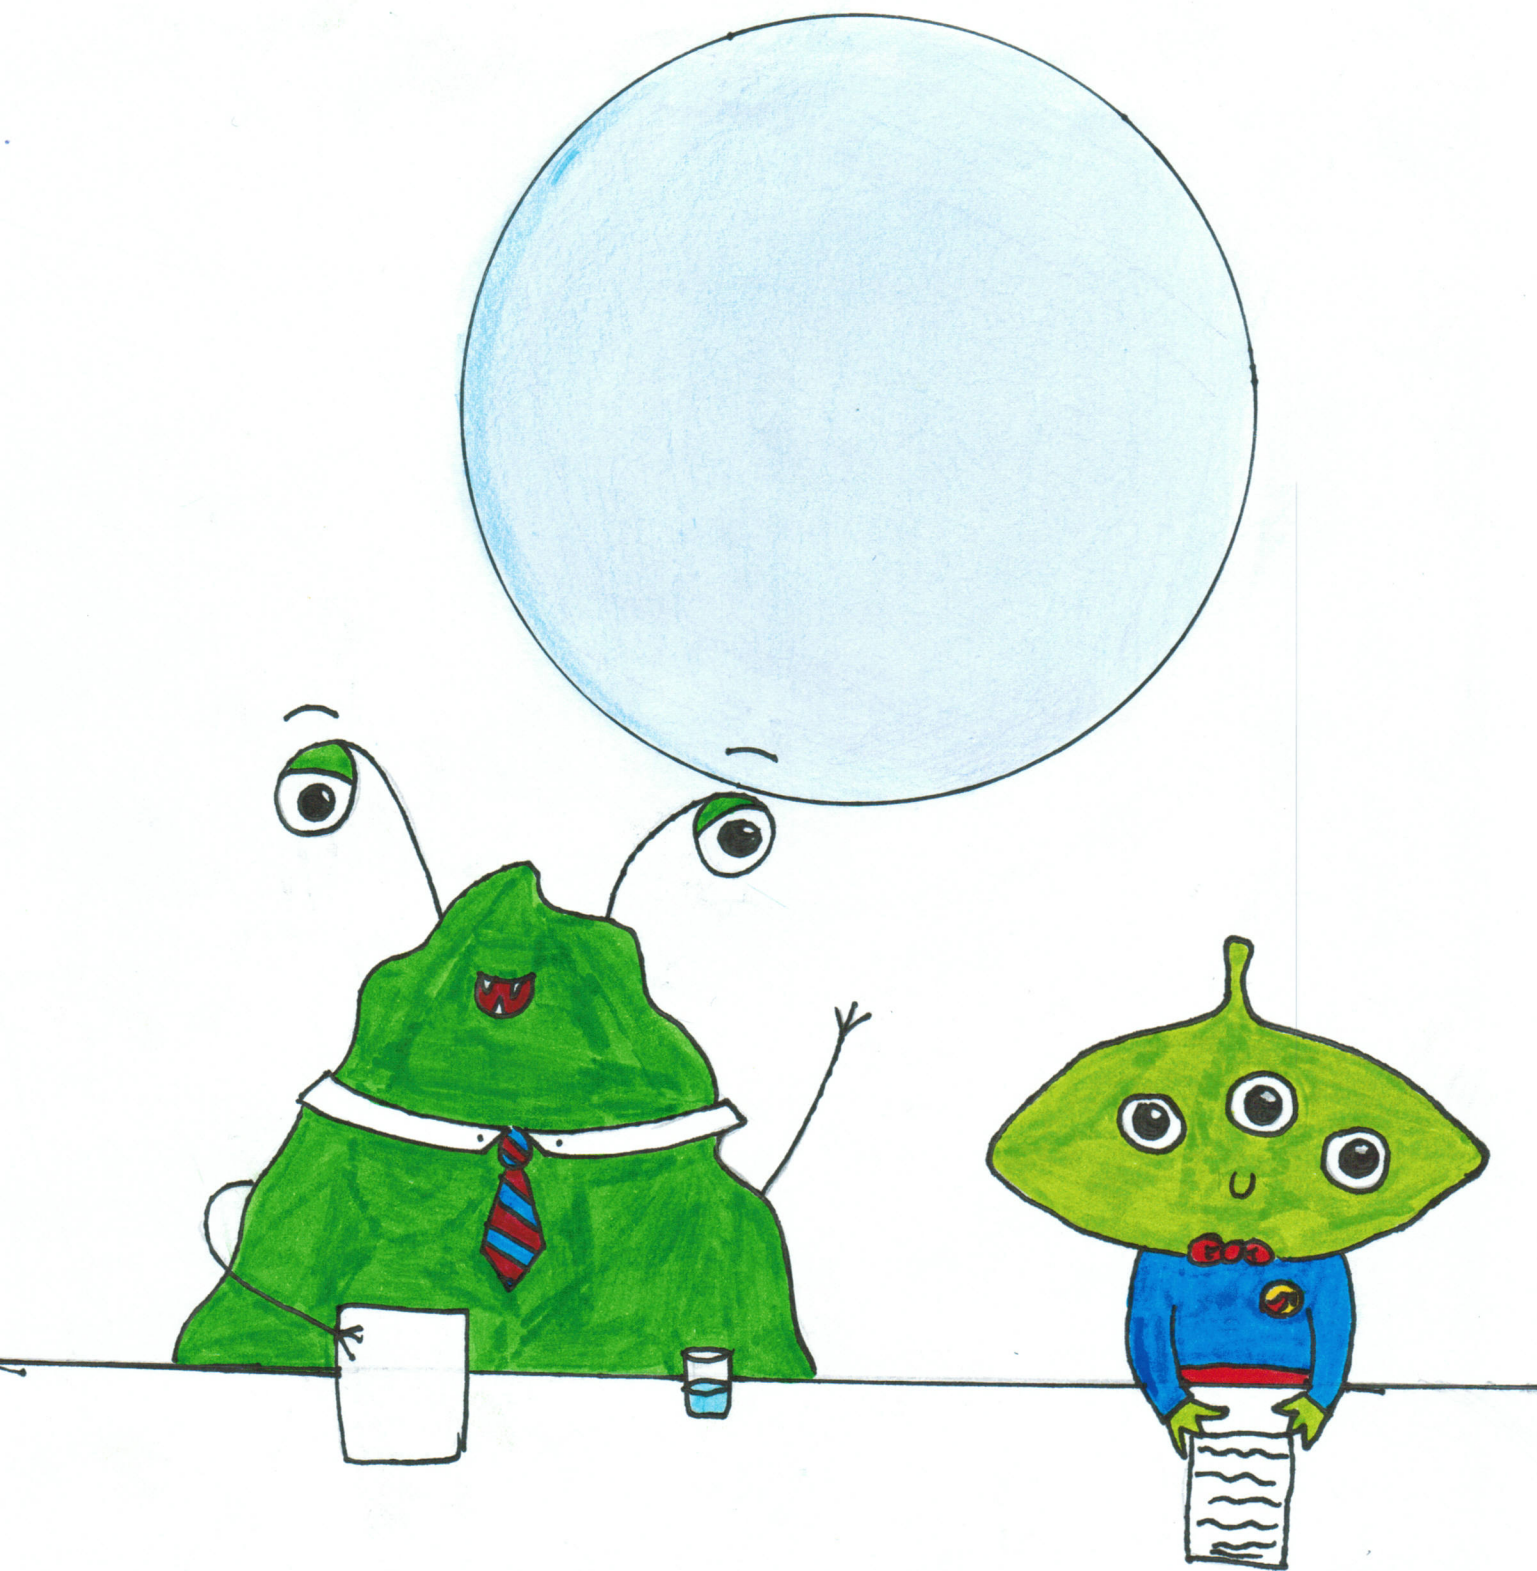

LILY - BLORGY - You bet . But, on Jupiter it's still stormy . It's also going to be minus one hundred and thirty five °c .

TYPHAINE - OLIE- Brrrr.

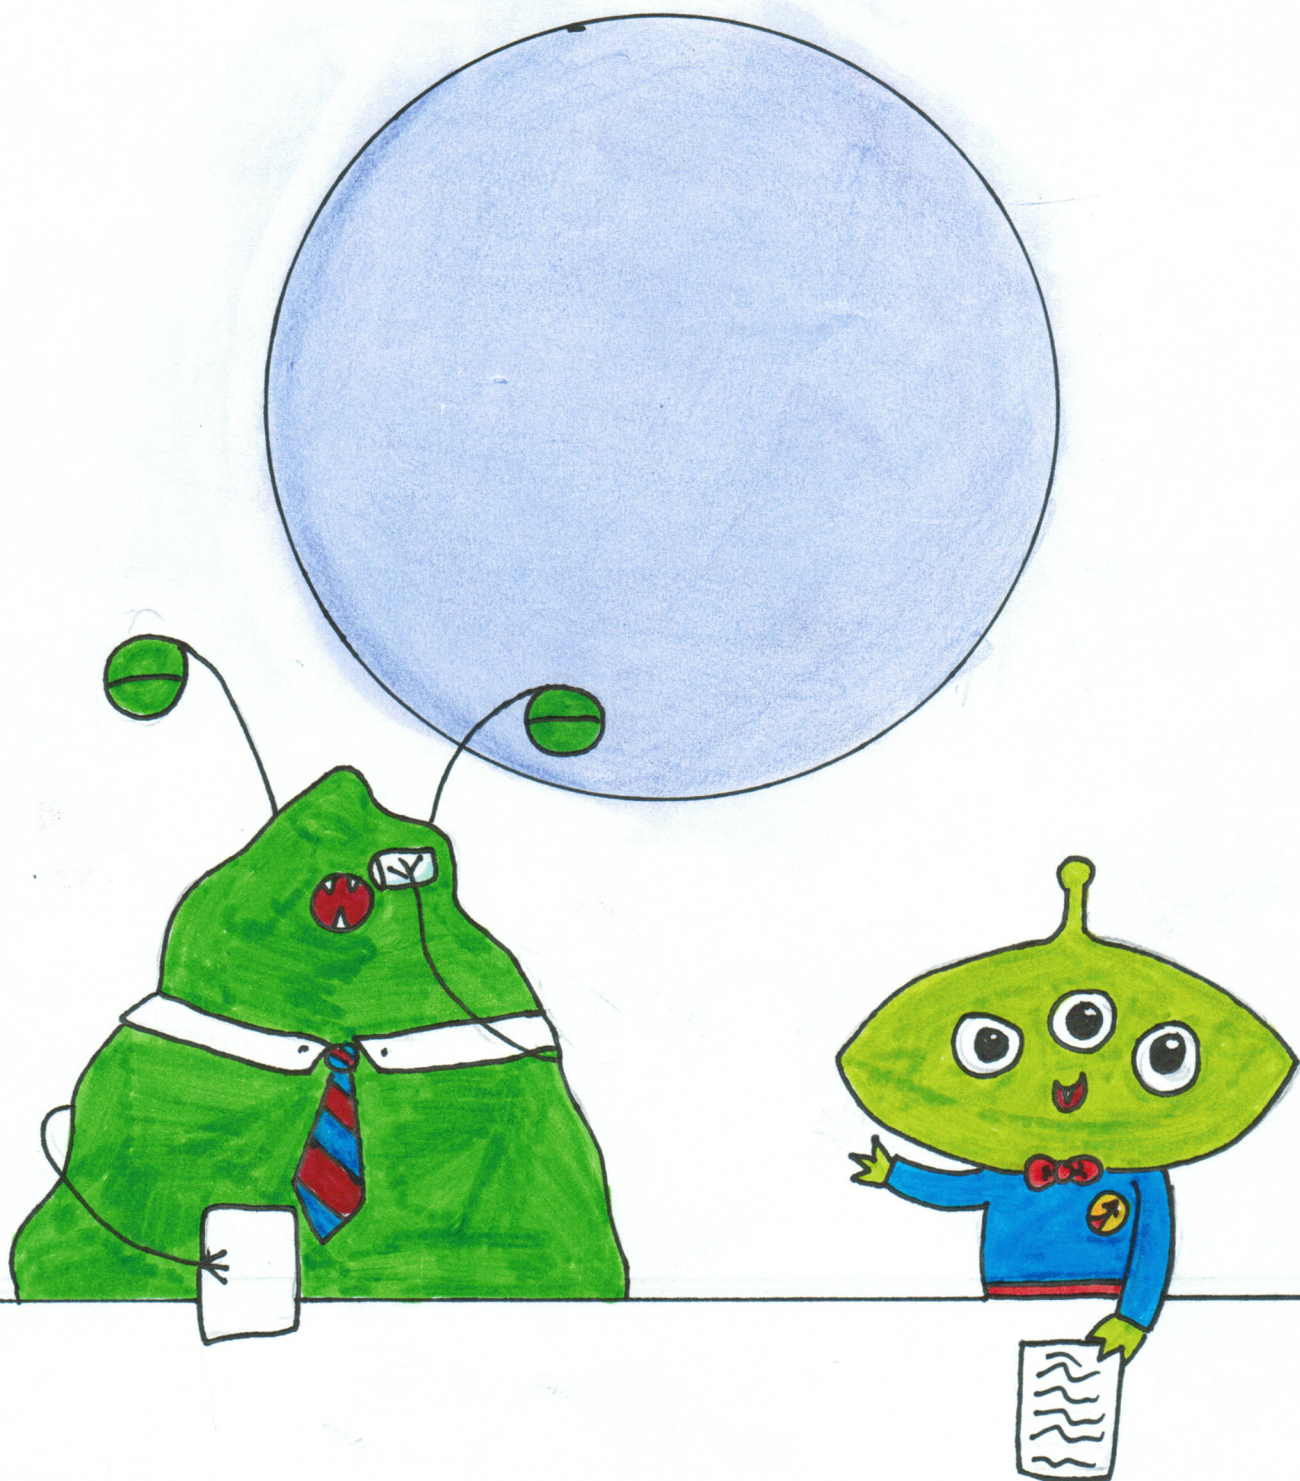

LILY - BLORGY - I agree.

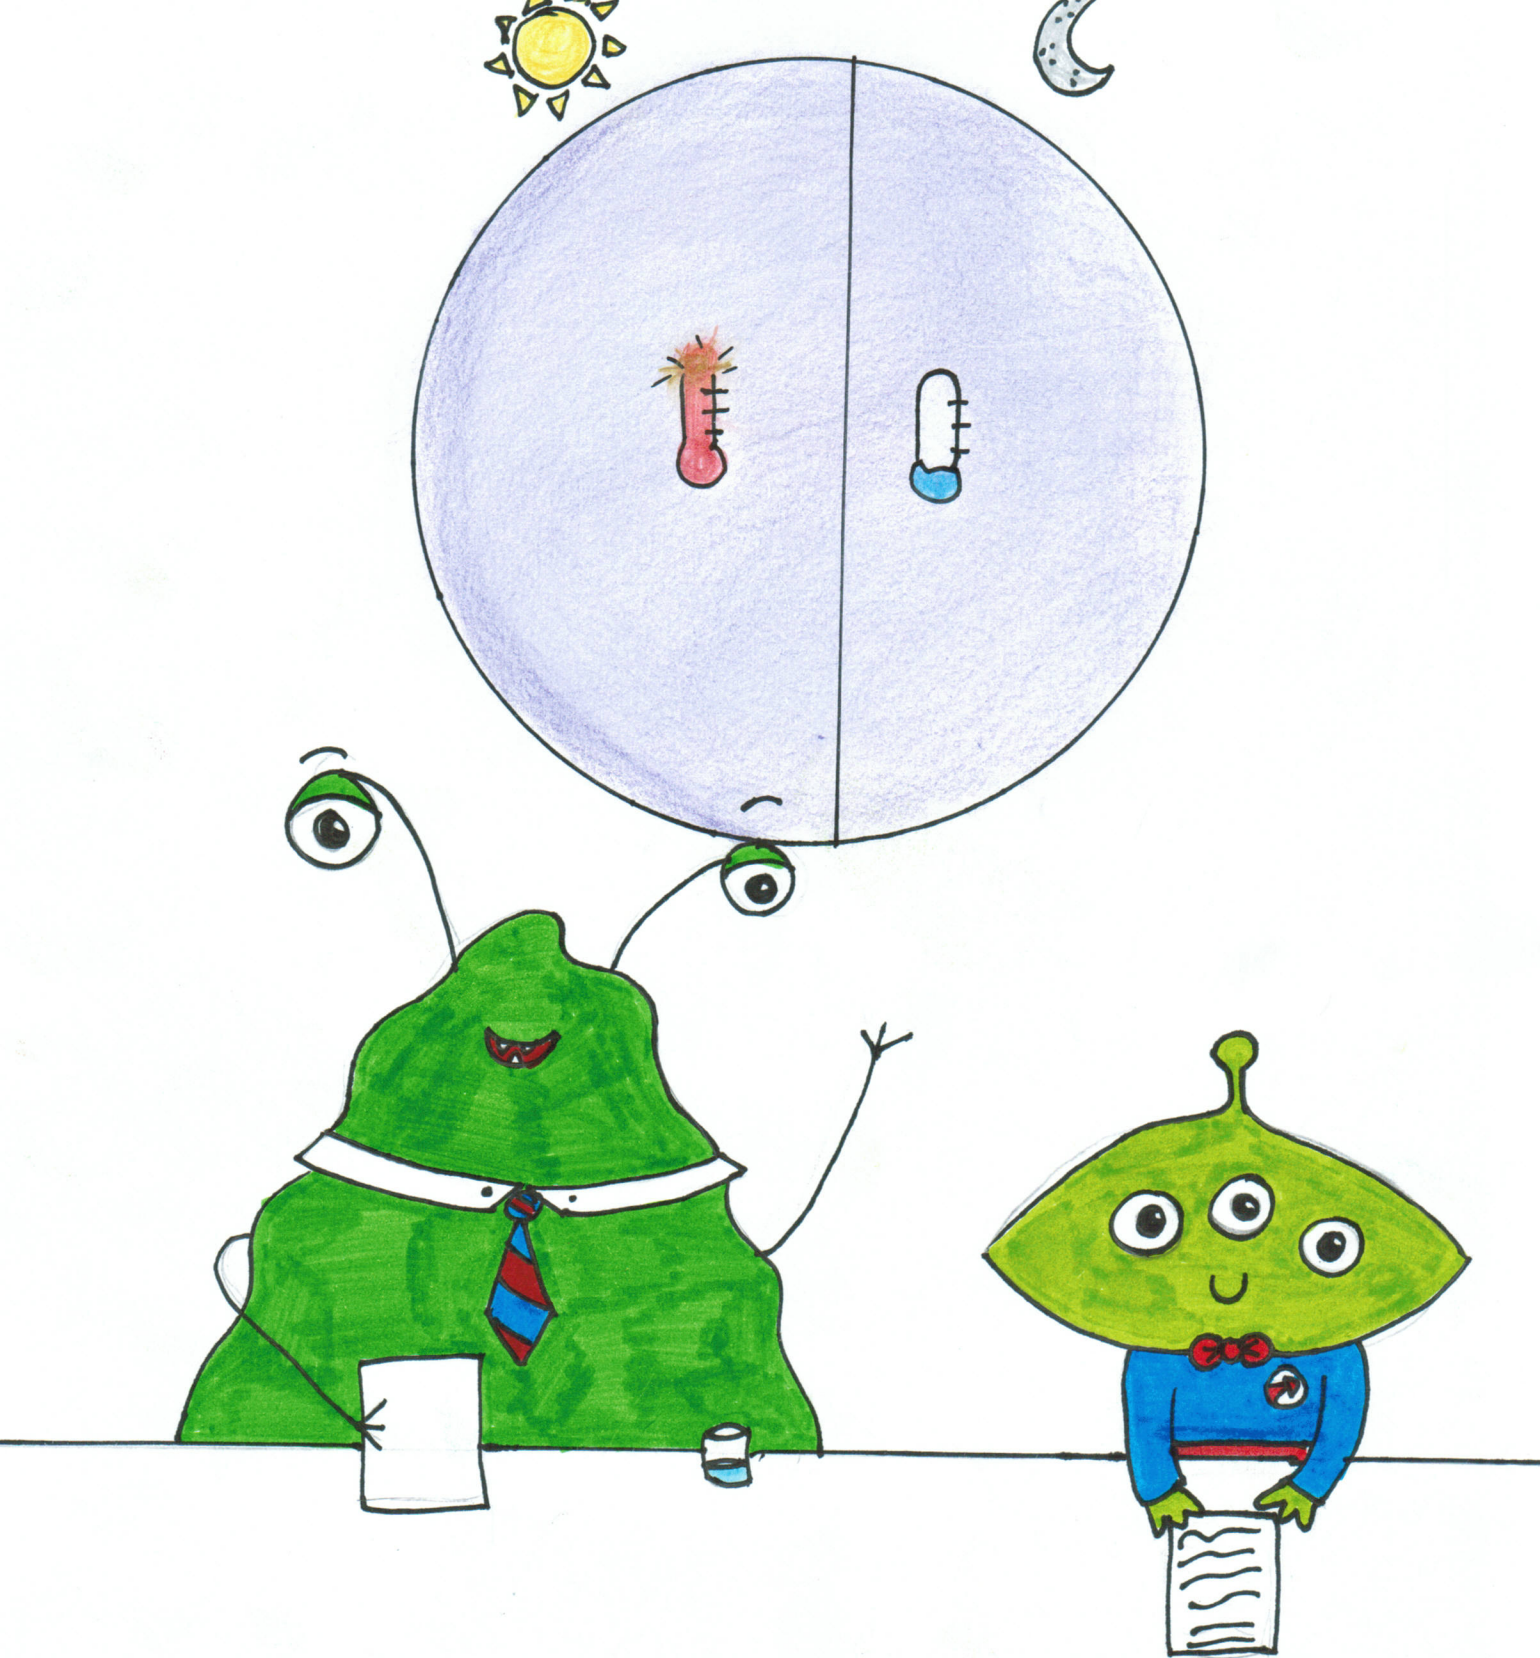

TYPHAINE - OLIE- Moving on now . On Saturn today it's minus one hundred and seventy eight °c

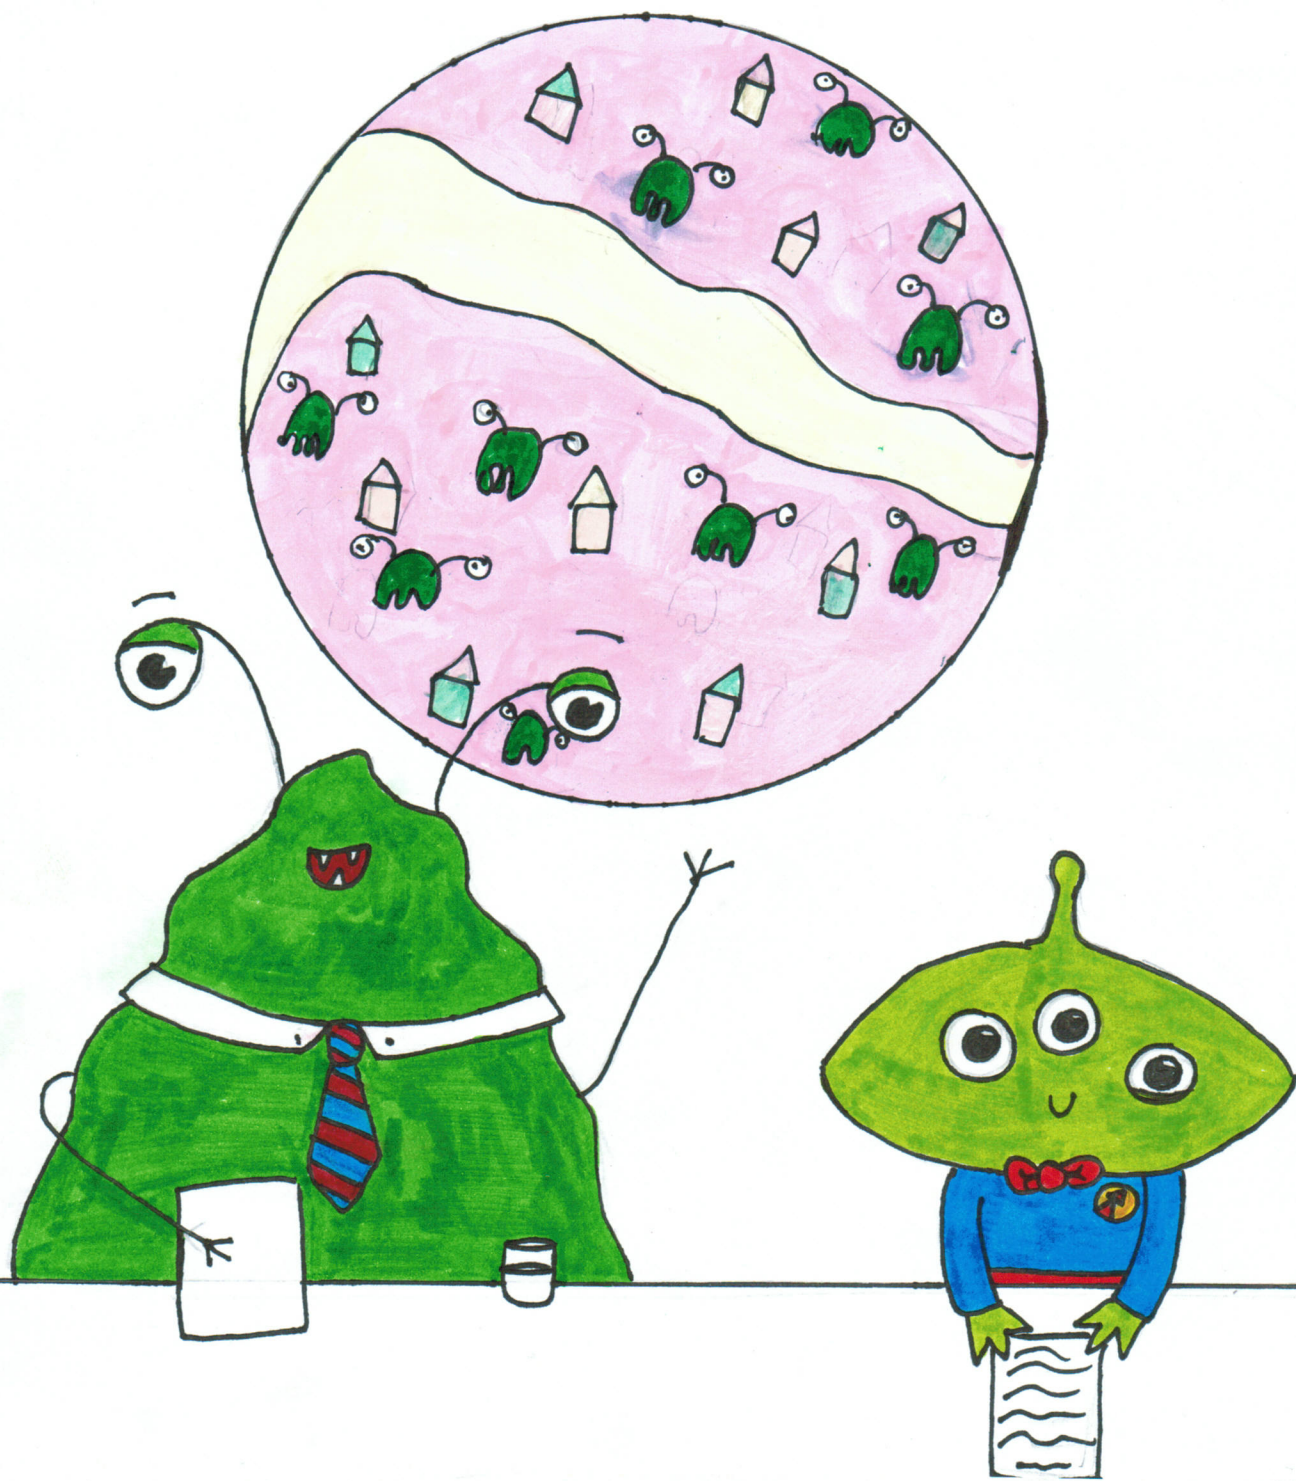

LILY - BLORGY - On Uranus it's around minus one hundred and thirty °c but, the temperatures may drop down to minus two hundred °c.

TYPHAINE - OLIE- On Neptune it's going to be minus two hundred and ten °c and there is a possibility of shooting stars.

LILY - BLORGY - You humans DON't consider Pluto to be a planet but we do, and it's minus two hundred and twenty three °c but, later it's going to be minus three hundred and thirty four °c

LILY - BLORGY - And now the weather of our home planet, Blorg. Today on Blorg, in the south it's going to rain cats and dogs... literally! In the west we will have sunny spells. In the east there's going to be a blizzard and in the north it's going to be windy and cold. The temperature will be around minus two hundred and fifty °c

LILY - BLORGY - That's all for now , See you soon , Goodbye

TYPHAINE - OLIE- Bye-bye !
